

Sad

Block Print

12 x 9cm

Exhibition Text

*Sad* is a representation of deforestation that is currently occurring all around the world and is destroying our planet. I have combined art and environmentalism into one piece of art explaining one of the biggest difficulties the earth is confronting at this moment. This piece was inspired by Jill Pelto and deforestation itself. This piece is an attempt to bring awareness to this issue and an attempt to spread the truth. The truth is that we are killing trees and that we can change that truth.
